

Judy Alqabbani

Game Developer | Game Engineer | MS Computer Science (Game Development), USC
Los Angeles, CA | (424) 660-0745 | judyqabbani@gmail.com | linkedin.com/in/judyalqabbani

SUMMARY

Gameplay engineer with a software engineering background, currently pursuing an MS in Computer Science (Game Development) at USC. I build the systems players feel directly, from camera and controller movement in Unreal Engine (C++, Blueprints) to progression and UI in Unity (C#), across two USC team games and my own narrative project. Seeking a Summer 2027 gameplay engineering internship.

EDUCATION

Master of Science, Computer Science (Game Development) | 08/2026 – Expected 05/2028

University of Southern California (USC) | Los Angeles, CA

Coursework: CSCI 580 3D Graphics and Rendering; CTIN 541 Design for Interactive Media

Bachelor of Engineering, Software Engineering | 2018 – 2022

Alfaisal University | Riyadh, Saudi Arabia

CGPA: 3.49/4.00 | Second Honors

GAME PROJECTS

Mr. Bladder Has to Go – Gameplay Engineer | 09/2026 – Present

USC Advanced Games Project (AGP) | 3D whimsical balancing and exploration game | PC/Mac | Unreal Engine (C++, Blueprints)

- Implementing right-stick camera rotation with camera-relative character movement on controller.
- Fixed a toilet audio bug and integrated the sound effect into the game through Wwise.
- Collaborating with artists, designers, producers, audio, usability, and QA using Git and Perforce.

Only Fights – Gameplay Engineer | 09/2026 – Present

USC MFA Thesis Game | 2D side-scrolling beat 'em up, 1-2 player local co-op | PC/Mac | Unity (C#)

- Building a livestream chat-burst feature for the game's influencer-streaming theme.
- Found and fixed a bug in the existing thesis codebase within my first two weeks on the team.

Shadow of the Past – Systems & Gameplay Developer | 11/2025 – Present

Narrative-driven single-player exploration game | Unity (C#) | Level 1 prototype completed 02/2026

- Built a C# player controller with smooth movement, jump handling, and ground detection.
- Designed an orb-collection progression system that unlocks new areas, with event-driven UI that updates as the player's state changes.
- Built modular scene, state, and audio management so new levels and puzzles plug in without changing gameplay logic.

TECHNICAL SKILLS

Game Development: Unreal Engine (C++, Blueprints), Unity (C#), Wwise, gameplay programming, game systems and mechanics, camera systems, controller input, 3D graphics and rendering

Programming: C++, C#, C, Python, Java, JavaScript, HTML5, CSS, object-oriented programming, debugging and optimization

Tools & Frameworks: Git, Perforce, Angular, Node.js, TensorFlow, Google Cloud, UiPath (RPA)

Soft Skills: Communication, teamwork, problem-solving, creativity, time management, attention to detail, research, presenting

EXPERIENCE

Infrastructure Pre-Sales Intern | 11/2023 – 11/2024

IBM | Riyadh, Saudi Arabia

- Presented IBM Power Systems and Storage solutions to clients, matching customer requirements to technical solutions.

RPA Developer | 05/2023 – 11/2023

AlFoadia Company Ltd | Riyadh, Saudi Arabia

- Built a UiPath robot to automate website data extraction, improving data accuracy and cutting manual work.

Software Engineering Intern | 06/2021 – 08/2021

National Industrial Development & Logistics Program (NIDLP) | Riyadh, Saudi Arabia

- Developed, tested, and debugged front-end and back-end web features in Angular and Node.js.

ADDITIONAL

Leadership & Awards: President, The Gamers Club, Alfaisal University (2019–2021); 2nd Place, Boeing Engineering Competition

Certifications: UiPath Associate RPA Developer; Zaka AI Bootcamp (Microsoft); 12 IBM certifications | **Languages:** Arabic, English
